One Network Platform For Critical Infrastructure

One Network Platform For Critical Infrastructure
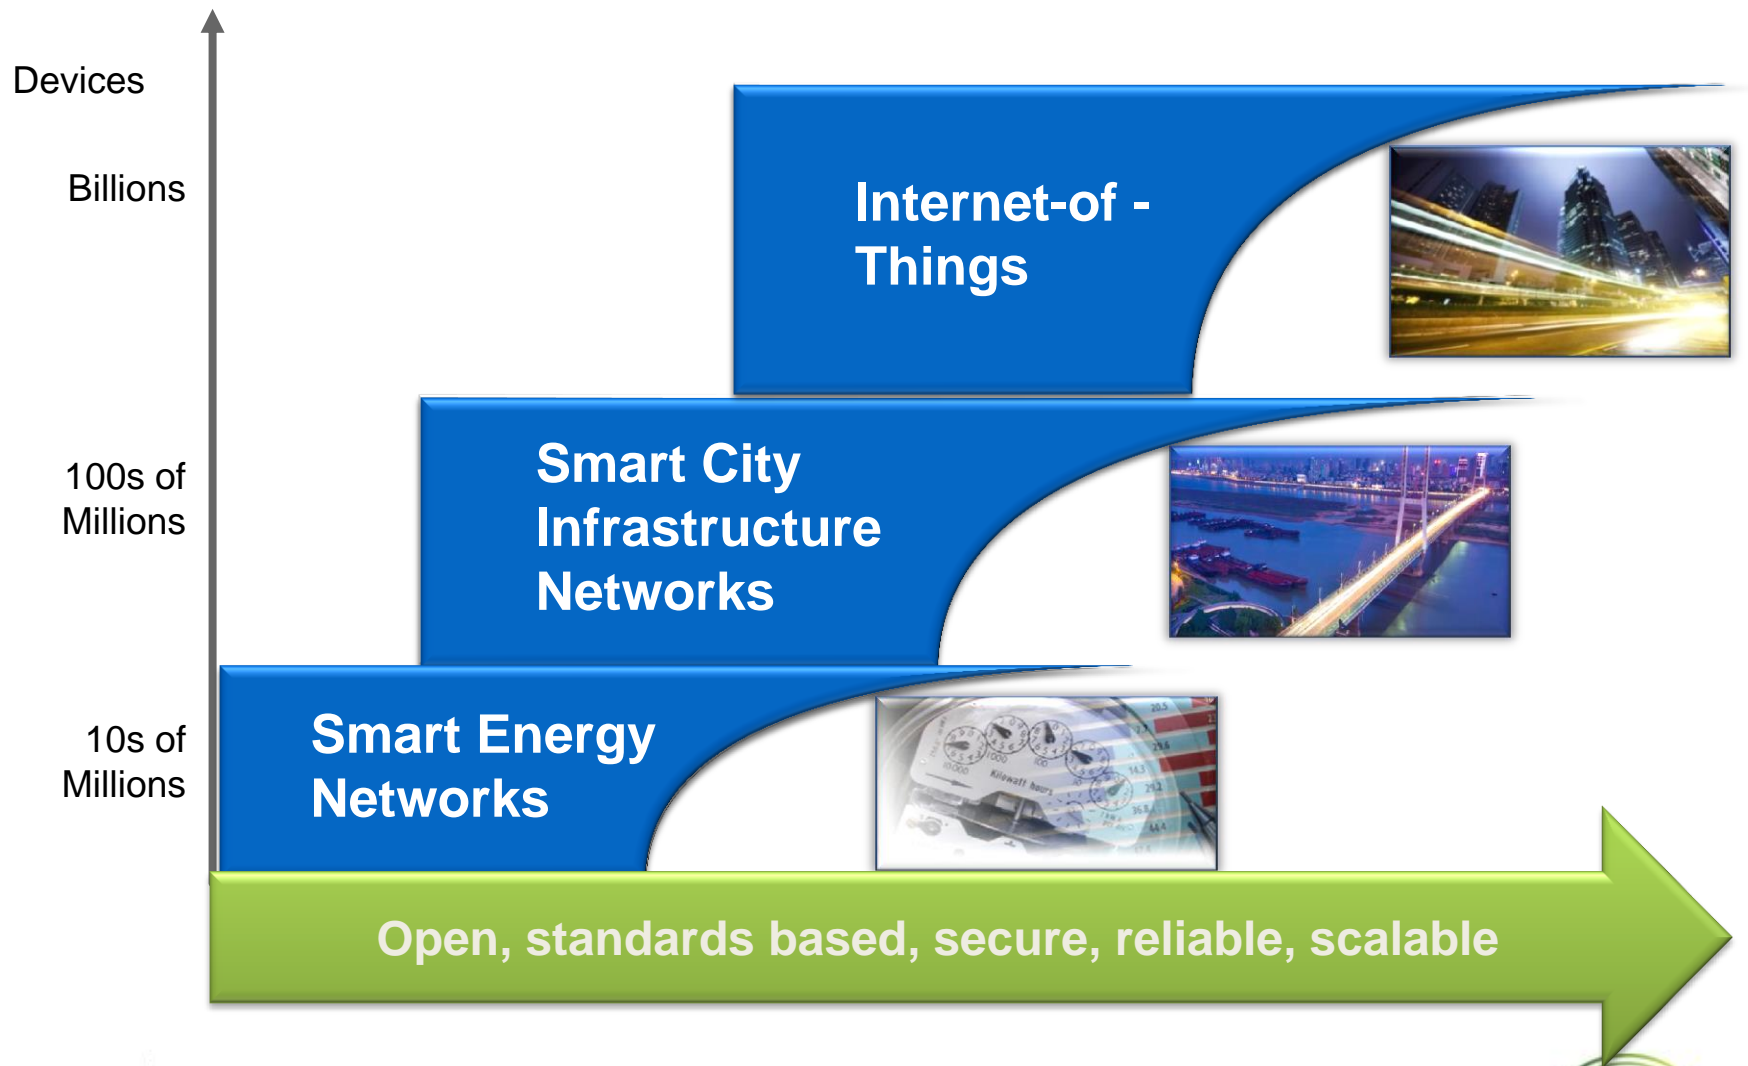

We need programs like CSMART

- Ingenuity and innovation
  - Next killer app does not have to come from Silicon Valley

- Spur adoption
  - Not from SSN or ComEd pushing

- Time to market / Speed adoption
  - Testing and verification

- Create excitement in space for the next generation
  - Millions to billions of connected devices

SSN's Role in CSMART

- Provide IIT professors & students access to SSN platform and technology

- Educate IIT students on SSN technology to build on the research and the work completed to date

- Provide new next generation of technologies/ systems/ software before deployment in the field

- Provide access to our technology experts

- Opportunities for interns and graduates

Thank you!
